

COURSE
AI Governance

1st Edition **Ethics** 

Protect Your IP, Stay Compliant, and Govern with Confidence

AI is transforming business faster than any previous technology, but with innovation comes risk. Without clear governance policies and employee awareness, organizations are exposing themselves to massive liability, from copyright infringement to compromised trade secrets. As regulators sharpen their focus on AI compliance, enterprise leaders need training that equips employees to responsibly leverage AI while protecting the organization's intellectual property and reputation. Emtrain's AI Governance Training prepares your workforce to navigate this new reality with confidence.

Course Description

Emtrain's AI Governance course delivers a practical, enterprise-ready framework for managing the legal, ethical, and operational risks of artificial intelligence. Through real-world scenarios, learners explore how AI intersects with intellectual property, data security, and organizational policies. The course empowers employees to make responsible decisions when using AI tools, safeguard proprietary information, and stay compliant with evolving regulations — all while supporting innovation and productivity.

Learning Objectives

- Understand how AI can inadvertently compromise trade secrets, copyrights, and proprietary assets.
- Learn the legal and ethical implications of AI usage — from prompt engineering to content generation.
- Gain actionable strategies for following organizational AI governance policies and staying compliant.

Course Features

- Access to our Anonymous Ask the Expert tool
- Rich video scenarios based on real-world events
- Built-in employee sentiment surveys
- 50+ Machine Translation Options
- Optional program timer
- Policy acknowledgement tool
- Extensive customization options

Lessons

AI and Managing Intellectual Property

This lesson is about how AI can increase the difficulty of protecting a company's intellectual property.

AI Can Undermine Trade Secrets

By putting trade secrets into a free, consumer AI tool, the employee has just undermined the company's confidential trade secrets.

AI and Copyright Protections

Prompting an AI tool to generate software code that enables specific features and functionality could easily violate another creator's copyright protections.

Following AI Governance Policies

This lesson outlines the importance of following organizational AI governance policies as well as information about the specific AI governance policy, applicable to the learner.
